K 072 NFPA 101 Life Safety Code

The Maintenance staffs remove items that were being stored in the hallway on July 26, 2010. The staff will be in-service on that items cannot be storage in the hallway on 08/25/2010. The lifts and rolling blood pressure station will be stored in the clean linen rooms when not being use. The Maintenance staff will monitor all the hallways to ensure that there are not any items being stored on the units. The Maintenance Director will report the results to Performance Improvement Committee (Executive Director, Director of Nursing, Medical Director, Rehab Manager, Director of Social Services, Activity Director, Dietary Manager, Medical Records, and Pharmacy Consultant) for six months.

The findings include:

Observation on June 26, 2010, between 8:50 a.m. and 11:00 a.m. revealed the following items stored in the corridor: patient lift near room 306, rolling blood pressure station plugged into receptacle in the corridor near room 306, patient lift near room 424, a geriatric near room 403, a wheelchair near room 406, and a patient lift near room 113. Following the fire drill observed by this surveyor at 10:30 a.m., the patient lifts were returned to the corridor. During interview with the maintenance supervisor on June 26, 2010, between 9:00 a.m. and 11:00 a.m., at the time of the corridor observations, he stated the patient lifts were stored in the shower rooms when not in use. Observation further revealed two shower rooms not in use and he further stated the resident showers were given at different times throughout the day.

Means of egress are continuously maintained free of all obstructions or impediments to full instant use in the case of fire or other emergency. No furnishings, decorations, or other objects obstruct exits, access to, egress from, or visibility of exits.

7.1.10

This STANDARD is not met as evidenced by: Based on observation, the facility failed to assure the means of egress is continuously maintained free of impediments, with no equipment storage in the corridor.

The findings include:

### K 147 NFPA 101 Life Safety Code

The Maintenance staff corrected by unplugging all medical equipment from the power strip and into the wall outlet on 8/3/2010 for rooms 106, 116, 311, 411, and 413, 422, 425, 439.

The Maintenance service on 8/25/2010 to inspect all the residents' rooms to ensure that no other medical equipment was plugged into power stripes. Any medical equipment found to be plugged into power strips were corrected at that time.

The Maintenance will inspect the residents' room on weekly bases to ensure no medical equipment is plugged into a power strip.

The Maintenance Director will report the finding to the Performance Improvement Committee (Executive Director, Director of Nursing, Medical Director, Rehab Manager, Director of Social Services, Activity Director, Dietary Manger, Medical Records, and Pharmacy Consultant) for six months.
