"This Plan of Correction is the facility’s credible allegation of compliance."

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

Date: 31 DEC 12

---

*Form CMS-3590 (04-95)*

*Effective 12/22/88*

*Facility's TIN: 1772800050*
On December 10-14, 2012 the annual Recertification survey and investigation of complaint # TN 9296 was completed. Section 483.10(e), 483.15(j)(4) PERSONAL PRIVACY/CONFIDENTIALITY OF RECORDS

The resident has the right to personal privacy and confidentiality of his or her personal and clinical records.

Personal privacy includes accommodations, medical treatment, written and telephone communications, personal care, visits, and meetings of family and resident groups, but this does not require the facility to provide a private room for each resident.

Except as provided in paragraph (a)(3) of this section, the resident may approve or refuse the release of personal and clinical records to any individual outside the facility.

The resident's right to refuse release of personal and clinical records does not apply when the resident is transferred to another health care institution; or record release is required by law.

The facility must keep confidential all information contained in the resident's records, regardless of the form or storage methods, except when release is required by transfer to another healthcare institution; law; third party payment contract; or the resident.

This REQUIREMENT is not met as evidenced by:

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?

On 12/11/12, Housekeeping Supervisor changed the privacy curtain surrounding Resident # 60. The privacy curtain is now long enough to fully enclose the bed to provide full visual privacy.

How will the facility identify other residents at the potential to be affected by the same deficient practice?

On 12/11/12, the management staff conducted an audit of the privacy curtains throughout the facility. Any curtains that were not long enough to fully enclose the bed were replaced by housekeeping staff.

What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?

The housekeeping staff has been educated by the Director of Environmental Services regarding the requirement for the privacy curtains to fully enclose the bed, to assure that when a curtain is replaced, a proper size is hung. Ambassadors have been educated by Staff Development Coordinator (SDC) to report to the Maintenance Director if a mechanical problem is the reason a curtain will not close and to report to the Housekeeping Supervisor if the curtain is to short, so that measures can be taken to repair or replace the curtain.
The nursing staff, licensed nurses and Resident Care Specialists was educated by the SDC regarding the requirement for privacy curtains to fully enclose the bed for full visual privacy, when care is being rendered. They were given the same instructions for reporting as the Ambassadors.

Education of above target audience will be complete by 1/15/13. Any staff member not completing education by this date will complete prior to next scheduled shift.

Ambassador rounds (conducted Monday—Friday) will include observation of privacy curtains for full bed enclosure. Any found not to be long enough or working properly will be reported to the Housekeeping Supervisor or the Maintenance Director.

The Administrator will observe the privacy curtains in 5 rooms weekly for 4 weeks then 5 rooms per month for 2 additional months to assure that privacy curtains fully enclose the beds.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?

Findings will be reported to the Quality Assurance Performance Improvement Committee (QAPI) for a period of three months or until substantial compliance is determined by the QAPI committee.

“Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.”
### Statement of Deficiencies and Plan of Correction

**Name of Provider or Supplier:** Newport Health and Rehabilitation Center  
**Street Address, City, State, Zip Code:** 128 Generation Drive, Newport, TN 37821

</tr>
</tbody>
</table>

An individual resident may self-administer drugs if the interdisciplinary team, as defined by §483.20(d)(2)(i), has determined that this practice is safe.

This REQUIREMENT is not met as evidenced by:
1. Based on medical record review, observation, and interview the facility failed to assure one resident (#25) was assessed prior to self-administration of a medication for one of forty residents reviewed.
2. The findings included:
   - Resident #25 was admitted to the facility on September 14, 2012, with diagnoses including Anemia, Heart Failure, Hypertension and Dementia.
   - Medical record review a Physician’s recertification orders dated December 1, 2012, revealed: "...Albuterol...three times a day..."
   - Observation of resident #25 in the resident’s room on December 10, 2012, at 12:10 p.m., revealed a nebulizer mask in place with medication inside and no licensed staff in the room. Continued observation revealed the nebulizer mask around the resident’s mouth and turned to the on position with no staff in view of the resident.

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?
- Effective 12/11/12, Resident #25 is now receiving a MD prescribed nebulizer treatment with a licensed nurse supervising resident until nebulizer treatment was completed.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?
- The SDC and DON will conduct education for licensed staff on the need to remain with residents receiving nebulizer treatments. Unless they have been assessed to meet criteria to safely self-administer their nebulizer treatment.

---

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

**Interview at the 300 hall nurse's station on December 10, 2012, at 12:35 p.m., with Registered Nurse (RN) #1 at the nurse's desk confirmed the RN started the medication and left the room while the medication was still being administered. Continued interview confirmed the RN was not in sight of the resident while the medication was being administered and the resident had not been assessed for self-administration of medications.**

**What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?**

- Education of above target audiences will be complete by 1/15/13. Any staff member not completing education by this date will complete prior to next scheduled shift.

- Unit manager will observe 2 MD prescribed Nebulizer treatments per week for 4 weeks then 2 per month for two additional months to assure that the licensed nurse remains with resident throughout the entire treatment.

**How will the facility monitor its corrective actions to ensure that deficient practice will not recur?**

Findings will be reported to the Quality Assurance Performance Improvement (QAPI) committee for a period of three months or until substantial compliance is determined by the QAPI committee.

<td>SAFE/CLEAN/COMFORTABLE/HOMELIKE ENVIRONMENT&lt;br&gt;The facility must provide a safe, clean, comfortable and homelike environment, allowing the resident to use his or her personal belongings to the extent possible. This REQUIREMENT is not met as evidenced by: Based on observation and interview, the facility failed to ensure a homelike environment related to odors within the facility for one of three resident hallways observed. The findings included:&lt;br&gt;&lt;br&gt;Observation on December 10, 2012, at 11:30 a.m., on the 100 Wing Hallway, revealed a strong urine odor on the front end of the 100 Wing Hallway.&lt;br&gt;&lt;br&gt;Observation on December 11, 2012, at 9:00 a.m., on the 100 Wing Hallway, revealed a lingering smell of urine noted in the front end of the 100 Wing Hallway.&lt;br&gt;&lt;br&gt;Observation on December 13, 2012, at 8:00 a.m., on the front end of the 100 Wing Hallway, revealed a continued lingering smell of urine.&lt;br&gt;&lt;br&gt;Interview on December 13, 2012, at 8:00 a.m., on the front end of the 100 Wing Hallway, with the Director of Nursing (DON) confirmed the lingering smell of urine on the front end of the 100 Wing Hallway. Continued interview revealed &quot;...am not sure what is causing the smell...have changed the mattress for one of the residents and...will change it again...&quot;</td>
<td>01/15/2013</td>
</tr>
</tbody>
</table>

### How will corrective action be accomplished for those residents found to have been affected by the deficient practice?
On 12/13/12 lingering urine odor was noted on the front end of the 100 hallway. The odor of urine has not been noted by residents, family members or staff. The mattress, having been identified as the source of odor, has been changed.

### How will the facility identify other residents as having the potential to be affected by the same deficient practice?
Facility rounds were conducted by Ambassador and Interdisciplinary Team (IDT) to determine if any lingering odors were identified. None were noted. Completed on 13DEC2012.

### What measures will be put in place to ensure that deficient practice will not recur?
Ambassador rounds will be conducted daily, Monday through Friday, with reports of any lingering odors to be directed to appropriate personnel to identify and address. The Manager on Duty (MOD) will conduct the same on weekends.

---

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
Education will be conducted by the Staff Development Coordinator, DON, and/or Administrator on the identification of a lingering odor to be directed to appropriate personnel to identify and address. This will be completed by 15JAN13. Any staff not having completed this training must complete prior to working the next scheduled shift.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?

The results will be reported to the Quality Assurance/Performance Improvement (QAPI) committee.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

<td>469.16(h)/(2) HOUSEKEEPING &amp; MAINTENANCE SERVICES</td>
<td></td>
</tr>
</tbody>
</table>

The facility must provide housekeeping and maintenance services necessary to maintain a sanitary, orderly, and comfortable environment.

This REQUIREMENT is not met, as evidenced by:

Based on observation and interview, the facility failed to maintain a sanitary environment for one (#87) of forty residents reviewed.

The findings included:

Resident #87 was re-admitted to the facility on June 8, 2012, with diagnoses including Diabetes Mellitus with Bilateral Above the Knee Amputations, Hypertension, and Depression.

A random observation in the resident’s room, during a medication pass, on December 11, 2012, at 1:00 p.m., revealed resident #87 eating from a lunch tray from the bedside table. The meal tray was set up by staff, and was placed in the center of the bedside table. To the left of the meal tray, on the table, was a urinal with approximately 300cc (cubic centimeters) of urine in the container.

Interview with the Director of Nursing (DON) on December 11, 2012, at the time of the observation, confirmed the urinal was not emptied and removed from the bedside table, prior to the resident’s meal tray being served.

<table>
<thead>
<tr>
<th>ID PREFERENCE TAG</th>
<th>PROVIDER PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCES TO THE APPROPRIATE DEFICIENCY)</th>
</tr>
</thead>
</table>
| F 253             | How will corrective action be accomplished for those residents found to have been affected by the deficient practice?  

The urinal was removed and the overbed table was sanitized. DON educated resident at that time that used urinals should not be placed on eating surfaces at mealtime. A holder for the urinal is located at the bedside for this purpose. He was then encouraged to notify a member of nursing when the urinal needed to be emptied.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?

Audits were conducted by nursing management on 12/13/12 to ensure that residents with urinals have holders available at bedside. Staff will provide education to residents concerning the use of bedside holders for urinals during mealtime and need to place urinals in holder during mealtime.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

</tr>
</thead>
<tbody>
<tr>
<td>What measures will be put in place to ensure that deficient practice will not recur?</td>
</tr>
<tr>
<td>01/13/2013</td>
</tr>
</tbody>
</table>

Ambassadors will conduct rounds (Mon thru Fri) and "Managers on Duty" (Sat and Sun) to ensure that residents are not placing urinals on overbed tables during mealtimes. If urinals are found on bedside table during mealtime, removal and cleaning is to be done. Resident will again be encouraged to use holders rather than overbed tables for urinals during mealtime.

SDC will provide education to licensed nurses and resident care specialists concerning the use of bedside holders for urinals during mealtime and need to place urinals in holder during mealtime. This education will be completed by 15JAN2013. Any staff not having completed this training must complete prior to working their next scheduled shift.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?

Findings will be reported to the Quality Assurance Performance Committee (QAPI) for a period of three months or until substantial compliance is determined by the QAPI committee.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
F 272  483.20(b)(1) COMPREHENSIVE  

ASSessments

- The facility must conduct initially and periodically a comprehensive, accurate, standardized reproducible assessment of each resident's functional capacity.

- A facility must make a comprehensive assessment of a resident's needs, using the resident assessment instrument (RAI) specified by the State. The assessment must include at least the following:
  - Identification and demographic information;
  - Cusotmy and physical assessment;
  - Cognitive patterns;
  - Communication;
  - Vision;
  - Mood and behavior patterns;
  - Psychosocial well-being;
  - Physical functioning and structural problems;
  - Continence;
  - Disease diagnosis and health conditions;
  - Dental and nutritional status;
  - Skin conditions;
  - Activity pursuit;
  - Medications;
  - Special treatments and procedures;
  - Discharge potential;
  - Documentation of summary information regarding the additional assessment performed on the care areas triggered by the completion of the Minimum Data Set (MDS); and
  - Documentation of participation in assessment.

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?

- Resident #47 had a full pain assessment done by DON on 12/31/12. MD was contacted and orders were received.
- Resident #103 had a Bowel and Bladder (B & B) Assessment done to reflect current status with care plan updated as indicated by Unit Manager on 12/13/12.
- Resident #125 is no longer in the facility.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?

- Members of nursing management will audit December 2012 MARS to identify residents who have received pain care and have received pain medication to ensure care has been completed and MD has been contacted for orders as indicated for residents to achieve adequate pain control.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

</tr>
</tbody>
</table>

The findings included:

- Resident #47 was readmitted to the facility on December 6, 2012, with diagnoses including Hypertension, Diabetes, Knee Replacement, Depression, and Chronic Pain Syndrome.

Interview with the resident, in his resident's room, on December 12, 2012, at 8:00 a.m., confirmed the resident received routine pain medications but occasionally had to request more medications due to the routine medications not controlling the pain.

Medical record review revealed a physician's orders for Lortab 10mg twice daily and Norco 5mg every six hours as needed. Review of the medication administration record (MAR) revealed the resident received PRN medications on December 11 and 12, 2012 in addition to the routine pain medication.

Review of the facility's Pain Management policy revealed, "Residents will be screened for pain by using the Monthly Summary (Briggs) and the Pain Evaluation Form...Additionally any resident report of inadequate pain control...will have a full evaluation of the pain conducted using the Pain Assessment Form."
"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
F 272 Continued

Continued record review revealed no documentation to reflect specific goals and interventions to address incontinence.

Interview with the facility Minimal Data Set (MDS) coordinator on December 12, 2012, at 10:24 a.m., in the MDS office, confirmed the resident's care plan did not address incontinence. Resident #103 was admitted to the facility on January 24, 2012, with diagnoses including Hypertension, Dementia with Behavioral Disorder, and Cerebral Vascular Accident.

Medical record review of the resident's Bowel and Bladder (B&B) Training assessment, dated September 18, 2012, revealed the resident was readmitted to the facility on August 28, 2012, following an acute hospitalization related to a Cerebral Vascular Accident. The B & B assessment indicated the resident was comatose and incontinent of bowel and bladder when readmitted to the facility. The assessment concluded the resident was not a candidate for B & B training in a comatose state.

Observation on December 12, 2012, at 4:20 p.m., revealed the resident resting on the bed, in the resident's room, a protective incontinence pad was under the resident.

Observation on December 13, 2012, at 9:05 a.m., revealed the resident sitting in a geri-chair near the 200 Hall nurse's station. The resident was alert but confused, and unable to participate in a resident interview.

Interview with the Unit Manager, on December 13, 2012, at 9:39 a.m., at the 200 Hall nurse's station.

2. When resident has a change of condition, the B & B Assessment is to be evaluated to assure that the current status of the resident is reflected and updated as indicated.

3. The change of condition information is communicated on the 24-hour report.

Education will be complete by 01/15/13. Any nurse not completing education will complete prior to next scheduled shift.

The Director of Nursing will audit 5 residents per week for 4 weeks, then 5 residents monthly for 2 additional months, who have Bowel and Bladder Assessment completed according to the MDS schedule or noted change of condition per 24 hour report to assure the assessment and care plan reflects the current B & B status of the resident. Re-education will occur as indicated.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?

Findings will be reported to the Quality Assurance Performance Improvement (QAPI) committee for a period of 3 months or until substantial compliance is determined by the QAPI committee.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
F 272: Continued

station, confirmed the resident's physical condition and level of consciousness had improved since the September 18, 2012 assessment. Continued interview revealed the facility failed to reassess the resident for continence retraining to promote and/or maintain normal bladder function, when the resident's medical condition improved.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

The resident has the right, unless adjudged incompetent or otherwise found to be incapacitated under the laws of the State, to participate in planning care and treatment or changes in care and treatment.

A comprehensive care plan must be developed within 7 days after the completion of the comprehensive assessment, prepared by an interdisciplinary team, that includes the attending physician, a registered nurse with responsibility for the resident, and other appropriate staff in disciplines as determined by the resident's needs, and, to the extent practicable, the participation of the resident, the resident's family, and the resident's legal representative; and periodically reviewed and revised by a team of qualified persons after each assessment.

This REQUIREMENT is not met as evidenced by:

Based on medical record review, observation, and interview, the facility failed to update the care plan for one resident (#149) of forty residents.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
F 280 \ Continued

reviewed.

The findings included:

Resident #149 was admitted to the facility on November 29, 2012, with diagnoses including Alzheimer's Dementia, Hypertension, and Anxiety Disorder.

Medical record review of a facility fall investigation dated December 2, 2012, revealed the resident had a fall with a skin tear to the left elbow.

Medical record review of the care plan dated December 3, 2012, revealed the care plan did not address the resident's skin tear to the left elbow.

Observation and interview with the Director of Nursing (DON), in the resident's room, on December 12, 2012, at 10:32 a.m., revealed the resident sleeping in bed with a healing skin tear to the left elbow.

Interview with Minimum Data Set (MDS) coordinator #1 on December 12, 2012, at 2:05 p.m., confirmed the facility failed to update the care plan to include interventions and treatment for the skin tear.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. | Medical record review of the Physician recititation orders dated December 6, 2012, revealed "Co - q - 10 (coenzyme) 200 mg (milligrams) every other day." Continued review of the current medication administration record (MAR) revealed "Co - q - 10 200 mg initiated December 7, 9, 2012 (indicating three doses given concurrently)."
| Observation and interview on December 11, 2012, at 9:16 a.m., revealed charge nurse #3 administering medications to resident # 150. Continued observation revealed the charge nurse obtained a bottle of Co - q -10 75 mg and administered to the resident. Interview with the charge nurse confirmed the 75mg was given instead of the 200mg ordered dose. |
| Interview with the Director of Nursing, in the DON office, on December 13, 2012, at 1:05 p.m., confirmed the facility failed to administer the correct dosage and frequency per Physician order. |
| How will the facility monitor its corrective actions to ensure that the deficient practice will not recur? Findings will be reported to the QAPI committee for a period of three months or until substantial compliance is determined by the QAPI committee. |

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
**F 315**

### 483.25(d) NO CATHETER, PREVENT UTILIZATION/RESTORE BLADDER

Based on the resident's comprehensive assessment, the facility must ensure that a resident who enters the facility without an indwelling catheter is not catheterized unless the resident's clinical condition demonstrates that catheterization was necessary; and a resident who is incontinent of bladder receives appropriate treatment and services to prevent urinary tract infections and to restore as much normal bladder function as possible.

This REQUIREMENT is not met as evidenced by:
- Based on medical record review, observation, and interview, the facility failed to complete an assessment and develop an individualized toileting plan for two residents (#103, #125) of forty residents reviewed.

The findings included:

- Resident #125 had been discharged at the time of review.

- The unit manager on 12/13/12 updated the Bowel and Bladder (B&B) assessment on Resident #103 to reflect current status.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?

- An audit on current residents will be completed by nursing management on 1/15/2013 to assure that bowel and bladder assessments are completed and in place. Updates or completions will be communicated to the MDS team and care plans will be updated.

</table>

Medical record review of the resident’s minimum data set (MDS) dated July 13, 2012, revealed a brief interview for mental status (SIMS) score of 9 indicating moderately impaired cognition. Continued medical record review of the MDS revealed resident usually understands and usually understands. Further review of the MDS revealed resident was frequently incontinent of urine.

Medical record review of the resident’s first Bowel Evaluation and Bladder Evaluation dated October 14, 2012, revealed an incomplete evaluation. Medical record of the MDS dated October 16, 2012, revealed resident was always incontinent of urine.

Interview with Director of Nursing (DON), in the DON office, on December 13, 2012, at 1:02 p.m., confirmed the resident Bowel Evaluation and Bladder Evaluation was incomplete and the resident was not placed on an individualized toileting program.

Resident #103 was admitted to the facility on January 13, 2012, with diagnoses including Hypertension, Dementia with Behavioral Disorder, and Cerebral Vascular Accident.

Medical record review of the resident’s Bowel and Bladder (B&B) Training assessment, dated September 18, 2012, revealed the resident was

F 315 | 01/15/2013 | What measures will be put in place or what systemic changes made to ensure that deficient practice will not recur? |

Education will be conducted by the Director of Nurses to the MDS team on the completeness of the bowel and bladder assessment with significant changes.

The education will be completed for the targeted audience by 1/5/13. Any staff not completing the education by this date will complete it prior to their next scheduled shift.

Director of Nursing will audit Significant change assessments weekly times four then 1 time a month for two additional months to ensure that Bowel and Bladder assessments reflect the current status of the resident.

| re-admitted to the facility following an acute hospitalization related to a Cerebral Vascular Accident. The B & B assessment indicated the resident was comatose and incontinent of bowel and bladder when re-admitted to the facility. The assessment concluded the resident was not a candidate for B & B retraining in a comatose state. Observation on December 12, 2012, at 4:20 p.m., revealed the resident resting on the bed, in the resident’s room. Continued observation revealed a protective incontinence pad had been placed under the resident. Observation on December 12, 2012, at 6:05 a.m., revealed the resident sitting in a geri-chair near the 200 bed nurse’s station. The resident was alert but confused, and unable to participate in a resident interview. Interview with the Unit Manager, on December 13, 2012, at 8:30 a.m., at the 200 bed nurse’s station, confirmed the resident’s physical condition and level of consciousness had improved since the September B & B assessment. Continued interview revealed the facility failed to implement a bladder retraining program to promote and/or maintain normal bladder function, when the resident's medical condition improved. How will the facility monitor its corrective actions to ensure that the deficient practice will not recur? Findings will be reported to the (QAPI) committee for a period of three months or until substantial compliance is determined by the QAPI committee. |

<th>DEFICIENCY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>483.30(e)</td>
<td>POSTED NURSE STAFFING</td>
</tr>
</tbody>
</table>

The facility must post the following information on a daily basis:
- Facility name.
- The current date.
- The total number and the actual hours worked by the following categories of licensed and unlicensed nursing staff directly responsible for resident care per shift:
  - Registered nurses.
  - Licensed practical nurses or licensed vocational nurses (as defined under State law).
  - Certified nurse aides.
- Resident census.

The facility must post the nurse staffing data specified above on a daily basis at the beginning of each shift. Data must be posted as follows:
- Clear and readable format.
- In a prominent place readily accessible to residents and visitors.

The facility must, upon oral or written request, make nurse staffing data available to the public for review at a cost not to exceed the community standard.

The facility must maintain the posted daily nurse staffing data for a minimum of 18 months, or as required by State law, whichever is greater.

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?
- The staffing form was updated on 12/13/12 to reflect the facility name, current census, date, and the total number of hours worked by RN's, LPN's, and resident care specialist.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?
- No direct affect was noted to residents.

What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?
- Unit Managers have been educated by the DON on posting the form to reflect the facility name, current date, census, and the requirement to add the projected hours of RN's, LPN's, resident care specialist with adjustments as necessary.

The Unit Manager will retain forms along with the key factor report.

This REQUIREMENT is not met as evidenced by:

Based on observation and interview, the facility failed to post the required staffing information related to the actual hours worked by licensed and unlicensed staff.

The findings included:

Observation on December 10, 2012, at 10:40 a.m., on the front entrance hallway information board of the facility, revealed the required posted daily staffing. Further observation revealed the actual hours worked information with no information documented.

Observation on December 13, 2012, at 8:00 a.m., on the front entrance hallway information board of the facility, revealed the daily staffing with the actual hours worked information and no information documented for the present data. Continued observation revealed the resident census was not documented at the start of the shift.

Interview on December 15, 2012, at 10:30 a.m., with the 100 Wing Clinical Manager and the Director of Nursing (CCaN), in the clinical manager's office, confirmed the required nursing staffing information was not posted at the beginning of the shift.

The Director of Nursing and/or Administrator will conduct audits twice a week for 4 weeks then once a month for two additional months to assure completeness of forms.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?

Findings will be reported to the QAPI committee for a period of three months or until substantial compliance has been determined by the QAPI committee.

(a.) A clarification order was obtained from Dr. for the Neurontin 200 mg BID and 300mg at HS for Resident # 73 on 12/11/2012 by unit manager.

(b.) A clarification order was obtained from Dr. for the CoQ-10 to be 100mg daily on resident # 150.

(c.) Kadian is now being administered to Resident # 22 as ordered by MD.
F 425: Continued:

A licensed pharmacist who provides consultation on all aspects of the provision of pharmacy services in the facility.

This REQUIREMENT is not met as evidenced by:

Based on observation, medical record review, facility policy review, and interview the facility failed to ensure two residents (922 & 9150) received medications as ordered, and failed to ensure accuracy of a physician order sheet for one resident (973) of forty residents reviewed.

The findings included:

Resident 973 was admitted to the facility on January 18, 2012, with diagnoses including Diabetes Mellitus, Anxiety, and Neuropathy.

Medical record review of physician recapitulation orders for October 2012 revealed "...neurontin (medication for seizures) 200 mg twice a day...neurontin 300 mg...at bedtime..." Continued medical record review of the physician recapitulation orders for November 2012 revealed the neurontin 200 mg twice a day was not carried over on the November order sheets.

Medical record review of the resident's medication administration record for November and December revealed the facility continued to give the medication as stated on the October physician recapitulation orders.

Interview with the resident's physician on

How will the facility identify other residents as having the potential to be affected by the same deficient practice?

An audit of December MARS was conducted by members of nursing management and consultant pharmacist to assure Physician Order Sheets are accurate. Clarification orders were obtained as indicated. This audit was completed by Dec 31.

Audit of residents receiving CO Q 10 will be conducted by members of nursing management to assure availability and proper dosing. This will be complete by 1/4/13.

Residents who receive Kadian will be audited by members of nursing management to assure that medication is available and being administered per order. This will be complete by 1/4/13.

What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?

Education will be conducted by Staff Development Coordinator (SDC) for licensed nurses on medication management.

F 425, Continued

December 12, 2012, at 2:20 p.m., at the 300 hall nurse's desk, revealed the physician wanted the resident to receive the medication 200 mg twice a day as given.

Interview with the Director of Nursing (DON), in the DON office, on December 13, 2012, at 1:10 p.m., confirmed that the pharmacy was responsible for checking the physician orders and failed to ensure the accuracy of the November physician orders.

Resident # 150 was admitted to the facility on December 8, 2012, with diagnoses including Coronary Artery Disease, Anemia, and Hypertension.

Medical record review of the physician recertification orders dated December 8, 2012, revealed "Co - c - 10 (cafeine) 200 mg (milligrams) every other day." Continued review of the current medication administration record (MAR) revealed "Co - c - 10 200 mg initiated and continued December 4 - 8, 2012, indicating three days the medication was unavailable.

Medical record review of the facility policy for Alternate Pharmacy Services revealed "...each facility will have an alternate local pharmacy provider to ensure that all ordered medications are available as needed..."

Interview with the facility central supply nurse on December 11, 2012, at 3:05 p.m., revealed the central supply nurse had not been notified of the order.

Interview with the Director of Nursing, in the DON office

management that will include process for ordering and receiving medications, to notify the physician and to notify the pharmacy and request that medication be sent from the backup.

Education will be completed by 1/15/13. Any licensed nurse not completing education will complete prior to next scheduled shift.

Members of nursing management who are responsible for end of month changeover will be educated by the Director of Nursing regarding process to assure that Physician order sheet is complete with current orders. This will be completed by December 31, 2012.

Unit Managers/Central Supply LPN/designee will conduct a MAR/CART audit weekly for 4 weeks then monthly for 2 additional months to assure availability of meds. MARS will be audited weekly for 4 weeks then monthly for 2 additional months to assure that there are no uncircled meds due to unavailable meds. Re-education will occur as indicated.

| F 425 | Continued | Office, on December 13, 2012, at 1:05 p.m., confirmed the facility failed to obtain the medication per facility policy.

Resident #22 was admitted to the facility on October 14, 2013 with diagnoses including Psychosis, Dementia, Gastroesophageal Reflux Disease (GERD), Hypothyroidism, Depression, Anxiety, Osteoarthritis (OA), Gout and Degenerative Joint Disease (DJD).

Medical record review of the Quarterly Minimum Data Set (MDS), dated November 9, 2012, revealed the resident scored an eleven on the Brief Interview for Mental Status (BIMS), indicating the resident was moderately cognitively impaired.

Review of the Medication Administration Record (MAR), dated December, 2012, revealed the resident was receiving Kadian (medication for pain) 140 mg (milligrams) every morning. Continued review revealed the medications were split into 100 mg packages and 20 mg packages (residents were to receive 2 tablets of the 20 mg dose for a total of 40 mg). Continued review of the MAR revealed the 20 mg tablets were circled (indicating the dose was not given to the resident). Further review revealed the resident did not receive the 20 mg tablets (40 mg) on December (2, 3, 4, 5, 6, 7, 8, 9, 10, 11) 2012 (10 days).

Medical record review revealed a prescription signed by the physician, dated December 10, 2012, "Kadian CR 20 mg, two (40 mg), po (by mouth) with 100 mg = 140 mg."

Medical record review of the resident's care plan.

### F 441 Continued

(2) Decides what procedures, such as isolation, should be applied to an individual resident; and
(3) Maintains a record of incidents and corrective actions related to Infections.

(b) Preventing Spread of Infection

1. When the Infection Control Program determines a resident needs isolation to prevent the spread of infection, the facility must isolate the resident.
2. The facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food. If direct contact will transmit the disease,
3. The facility must require staff to wash their hands after each direct resident contact for which hand washing is indicated by accepted professional practices.

(c) Linens

Personnel must handle, store, process and transport linens so as to prevent the spread of infection.

This REQUIREMENT is not met as evidenced by:

Based on observation, interview and review of facility policy, the facility failed to maintain standard infection control practice related to failure to wash or sanitize the hands during ice pass for two resident rooms observed; failed to ensure standard infection cleaning of the ice cart for one of three ice carts; failed to remove contaminated breakfast foods from the dining area prior to the lunch dining observation; and failed to maintain a clean environment in the

### F 441

Dietary Manager instructed dietary staff to do a visual check of the dining room prior to serving meal trays to the residents.

SDC instructed nursing staff to do a visual check of dining room to assure there are no soiled dishes prior to serving trays.

(5) Shower room was cleaned by nursing staff and housekeeping staff was called for deep cleaning of shower room.

Education was conducted for RCS’s that included the requirement that shower rooms must be cleaned between residents and after resident use.

Education was conducted by the Housekeeping Supervisor with housekeeping staff that shower rooms are to be deep cleaned after morning showers and again after lunch.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
Continued From page 23

shower room on the 100 Wing Hallway for one of the two shower rooms on the 100 Wing Hallway.

The findings included:

Observation on December 10, 2012, at 10:45 a.m., during the initial tour of the facility, on the 300 Wing Hallway, revealed CNA (Certified Nurse Assistant) #1, passing ice on the 300 Wing Hallway. Continued observation revealed that the CNA entered and exited the room on the hallways with the ice, placed the ice on the bedside and exited the room and failed to wash or sanitize the hands prior to entering and exiting the rooms.

Interview with the CNA on December 10, 2012, at 10:45 a.m., on the 300 Wing Hallway, confirmed the CNA failed to wash or sanitize the hands between entering and exiting the rooms after filling the ice pitchers and returning the pitchers to the rooms.

Review of the facility policy, Hand Hygiene, with a revision date of 2009, revealed "...if hands are not visibly soiled, use an alcohol-based hand rub for routinely decontaminating hands in all clinical situations..."

Interview on December 10, 2012 at 11:00 a.m., with Registered Nurse (RN) #1, on the 300 Hallway, confirmed the CNA failed to wash or sanitize the hands during ice pass and failed to follow standard infection practice.

Observation on December 10, 2012, at 10:45 a.m., on the 300 Wing Hallway, during the ice pass, the CNA failed to wash or sanitize the hands during ice pass and failed to follow standard infection practices.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?

Random observations will be conducted to assure that infection control procedures are being followed.

What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?

(a.) Hand hygiene observations will be conducted at random by SDC, DON, Unit Managers or designee to assure that proper procedures are being followed.

(b.) Random inspection of ice carts will also be conducted by Dietary Manager, DON, SDC or designee.

(c.) Random audits will be conducted to assure that no soiled dishes are in dining room when trays are served.

<td>F 460</td>
<td>483.70(d)(1)(v) BEDROOMS ASSURE FULL VISUAL PRIVACY</td>
</tr>
</tbody>
</table>

Bedrooms must be designed or equipped to assure full visual privacy for each resident.

In facilities initially certified after March 31, 1992, except in private rooms, each bed must have ceiling suspended curtains, which extend around the bed to provide total visual privacy in combination with adjacent walls and curtains.

This **REQUIREMENT** is not met as evidenced by:
- Based on observation and interview the facility failed to provide full visual privacy for two residents (#30 & #148) of forty residents reviewed.

The findings included:
- Observation in the resident room on December 11, 2012, at 11:12 a.m., revealed resident #30’s privacy curtain with several broken plastic hooks to support the privacy curtain. Continued observation of resident #148’s privacy curtain revealed several broken plastic support hooks and a support hook preventing the privacy curtain from sliding forward.
- Observation and interview with the facility maintenance director on December 11, 2012, at 11:18 a.m., confirmed the privacy curtains were not functional to provide full privacy for the two residents.

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?
- On 12/11/12, the Maintenance Director repaired the privacy curtain of Resident # 30. Broken plastic support hooks were removed and new ones installed. This assured the curtain could be pulled freely around bed so that full visual privacy was achieved.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?
- On 12/11/12, during survey, an audit of all privacy curtains throughout the facility was completed. Any curtains found not functioning correctly were repaired or replaced by Maintenance Director or housekeeping staff.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

What measures will be put in place or systemically changes made to ensure that the deficient practice does not recur?

Housekeeping staff, nursing staff, therapy staff and ambassadors have been educated by SDC or designee to ensure that privacy curtains are in working order so that full visual privacy can be assured. All staff has been instructed to report mechanical issues with the privacy curtains to Maintenance Director and to report curtains that are not long enough to surround the bed to the Housekeeping Supervisor so that a new one can be hung.

Ambassador rounds (Mon - Fri) and Manager-on-Duty Rounds (Sat-Sun) will include observation of privacy curtains with any issues to be reported to the appropriate party.

How will the facility monitor its corrective actions to ensure that the deficient practice does not recur?

Findings will be reported to the QAPI committee for a period of three months or until substantial compliance is determined by the QAPI committee.

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."
The nurses' station must be equipped to receive resident calls through a communication system from resident rooms and toilet and bathing facilities.

This REQUIREMENT is not met as evidenced by:
- Based on observation and interview, the facility failed to maintain a nursing call system for two (#107 & #69) of forty sampled residents.

The findings included:
- Observation and interview, in the resident's room, with the Social Worker on December 11, 2012, at 10:30 a.m., revealed resident #107's bedside call light wire had been cut. Interview at that time confirmed the resident's call light was not in functioning order.
- Observation and interview, in the resident #69's room, with Licensed Practical Nurse (LPN #1) on December 11, 2012, at 10:30 a.m., revealed the resident's bedside call light could not be activated. Interview with the LPN at that time confirmed the resident's call light was not in functioning order.

<th>F 463</th>
</tr>
</thead>
</table>

How will corrective action be accomplished for those residents found to have been affected by the deficient practice?
- The call lights were replaced for Residents #107 & #69 and are in working order. This was completed on 11DEC2012.

How will the facility identify other residents as having the potential to be affected by the same deficient practice?
- An audit was completed on 12/28/12 by management staff. All call lights in the building were reviewed to ensure they were functioning properly.

What measures will be put in place or systemic changes made to ensure that deficient practice will not recur?
- Education was given to Ambassadors on checking of call lights for proper functionality during Ambassador Rounds (Mon-Fri) and MOB Rounds (Sat-Sun). They were instructed to report any issues with the functionality of call lights to the Maintenance Director for correction.
- Extra call light cords are available in central supply and med room for after hours or weekend availability.

How will the facility monitor its corrective actions to ensure that the deficient practice will not recur?
- Findings will be reported to the QAPI committee for a period of three months or until substantial compliance is determined by the QAPI committee.

F 520: 483.75(e)(1) QAA
COMMITTEE-MEMBERS MEET QUARTERLY/PLANS

A facility must maintain a quality assessment and assurance committee consisting of the director of nursing services, a physician designated by the facility, and at least 3 other members of the facility's staff.

The quality assessment and assurance committee meets at least quarterly to identify issues with respect to which quality assessment and assurance activities are necessary, and develops and implements appropriate plans of action to correct identified quality deficiencies.

A State or the Secretary may not require disclosure of the records of such committee except insofar as such disclosure is related to the compliance of such committee with the requirements of this section.

Good faith attempts by the committee to identify and correct quality deficiencies will not be used as a basis for sanctions.

This REQUIREMENT is not met as evidenced by:
Based on review of Quality Assessment and

"Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law."

The findings included:

Review of the facility's QAA sign-in sheets for May, June, July, September, October and November, 2012, revealed the designated physician had not signed the facility's sign-in sheet indicating his/her attendance at the monthly QAA meetings.

Observation on December 9, 2012 and December 13, 2012, revealed the facility's medical director was in the facility making rounds for the residents.

Interview with the Administrator on December 13, 2012, at 2:00 p.m., in the administrator's office, revealed the facility meets on a monthly basis for QAA. Further interview with the administrator confirmed the designated physician failed to sign the facility's QAA sign-in sheets for May, June, July, September, October and November 2012. Further interview revealed the physician was in the building on December 13, 2012.
