K 018 NFPA 101 LIFE SAFETY CODE STANDARD

Doors protecting corridor openings in other than required enclosures of vertical openings, exits, or hazardous areas are substantial doors, such as those constructed of 1/4 inch solid-bonded core wood, or capable of resisting fire for at least 20 minutes. Doors in sprinklered buildings are only required to resist the passage of smoke. There is no impediment to the closing of the doors. Doors are provided with a means suitable for keeping the door closed. Dutch doors meeting 19.3.6.3.6 are permitted. 19.3.6.3

Roller latches are prohibited by CMS regulations in all health care facilities.

This STANDARD is not met as evidenced by: Based on observation, it was determined the facility failed to protect the corridor openings.

The finding included:

Observation on 12/2/13 at 9:45 AM revealed the supply closet in the 400 hall did not have a door. The closet contained a trash bin, soiled linen bin, and biohazard bin.

This finding was acknowledged by the maintenance director and the facility administrator during the exit conference on 12/2/13.

K 066

K 018 NFPA Life Safety Code Standard

How the corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice.

On 12/2/13, the trash, soiled-linen and Biohazard bins were permanently removed from the 400 hall storage closet and placed in the 400 hall shower room, on storage side.

How the facility will identify other residents having the potential to be affected by the same deficient practice.

All residents have the potential to be affected

The Maintenance Director will monitor the 400 hall closet weekly for proper storage.

What measure will be put in place or systemic changes made to ensure that the deficient practice will not occur.

The Maintenance Director will be responsible for monitoring 400 hall closet and add 400 hall closet to weekly check list.

How the facility will monitor its corrective actions to ensure the deficient practice is being corrected and will not recur.
The Maintenance Director will bring 400 hall check list to the Quality Assurance Performance Improvement Committee meeting monthly, for (3) months and then PRN, if needed. The Quality Assurance Performance Improvement Committee members are the Administrator, Director of Nursing, Staff Development Coordinator, Social Services Director, Maintenance Director, Business Office Manager, Dietary Manager and the Medical Director.

Smoking regulations are adopted and include no less than the following provisions:

(1) Smoking is prohibited in any room, ward, or compartment where flammable liquids, combustible gases, or oxygen is used or stored and in any other hazardous location, and such area is posted with signs that read NO SMOKING or with the international symbol for no smoking.

(2) Smoking by patients classified as not responsible is prohibited, except when under direct supervision.

(3) Ashtrays of noncombustible material and safe design are provided in all areas where smoking is permitted.

(4) Metal containers with self-closing cover devices into which ashtrays can be emptied are readily available to all areas where smoking is permitted. 19.7.4

This STANDARD is not met as evidenced by:

Based on observations, it was determined the facility failed to comply with the smoking regulations.

The finding included:

Observation on 12/2/13 at 9:47 AM revealed there were no metal containers with self-closing cover devices into which ashtrays can be emptied that are readily available to all areas where smoking is permitted.
