<td>Doors protecting corridor openings in other than required enclosures of vertical openings, exits, or hazardous areas are substantial doors, such as those constructed of 1% inch solid-bonded core wood, or capable of resisting fire for at least 20 minutes. Doors in sprinklered buildings are only required to resist the passage of smoke. There is no impediment to the closing of the doors. Doors are provided with a means suitable for keeping the door closed. Dutch doors meeting 19.3.6.3.6 are permitted. 19.3.6.3.6</td>
<td>The following POC is being submitted as required by federal regulations. The submission of this POC is not in any way admission by the facility as to the accuracy of the citation nor the finding of the fact.</td>

1. Commercial 4.5 spring hinges were installed on resident rooms 20 & 24 on 7/16/2013.
2. Life Safety/Maintenance issues will be monitored by Administrator and Maintenance Director daily and through Monthly QA process.

Roller latches are prohibited by CMS regulations in all health care facilities.

RECEIVED JUL 30 2013

This STANDARD is not met as evidenced by:
Based on observation, it was determined the facility failed to prevent the blocking of corridor doors in the open position.

The findings included:

Observations during the initial tour on 7/14/13 beginning at 9:10 AM, revealed the following corridor doors were blocked in the open position by bathroom doors in each room:
- Resident rooms 20 and 24.
- The medical supply room.

Susan Thompson, Admin. 7/30/13
**K 018 Continued From page 1**

This finding was verified by the maintenance supervisor and acknowledged by the administrator during the exit conference on 7/14/13.
