**N 900** 1200-8-6-09 LIFE SAFETY

1. To correct the deficient practice, on March 29, 2011, the Director of Maintenance contacted a local electrical contractor to remove the back-up battery power for the six exit doors. The corrective action will be completed on April 22, 2011. The corrective action will be reported to the Administrator as soon as completed.

2. The deficiency and corrective action will be reported by the maintenance Director to the Quality Improvement Committee at the April 21, 2011 meeting. The Administrator will report the deficiency and corrective action to the Board of Directors at the April 26, 2011 meeting.

---

**Summary Statement of Deficiencies**

- **N 900** 1200-8-6-09 Life Safety

- This Rule is not met as evidenced by:
  - NFPA 72 2002 Edition
  - 6.15.7.3 All exits connected in accordance with 6.15.7.1 shall unlock upon loss of the primary power to the fire alarm system serving the protected premises. The secondary power supply shall not be utilized to maintain these doors in the locked condition.

- This Rule is not met as evidenced by:
  - Based on interview, it was determined the facility had six exit doors with magnetic door locks with a secondary power supply.

- The findings included:
  - During an interview in the dining room on 3/28/11 at 9:05 PM, the maintenance director revealed the six exit doors with magnetic locks were connected to the generator emergency power supply and also had battery back up power.
