F 278  483.20(g) - (i) ASSESSMENT  
SS=D  ACCURACY/COORDINATION/CERTIFIED  

The assessment must accurately reflect the resident's status.

A registered nurse must conduct or coordinate each assessment with the appropriate participation of health professionals.

A registered nurse must sign and certify that the assessment is completed.

Each individual who completes a portion of the assessment must sign and certify the accuracy of that portion of the assessment.

Under Medicare and Medicaid, an individual who willfully and knowingly certifies a material and false statement in a resident assessment is subject to a civil money penalty of not more than $1,000 for each assessment; or an individual who willfully and knowingly causes another individual to certify a material and false statement in a resident assessment is subject to a civil money penalty of not more than $5,000 for each assessment.

Clinical disagreement does not constitute a material and false statement.

This REQUIREMENT is not met as evidenced by:

Based on medical record review, observation, and interview, it was determined the facility failed to ensure the Minimum Data Set (MDS) was accurate for range of motion (ROM), catheters, and/or pneumonia vaccine for 4 of 26 (Residents 3, 5, 9, 22).  

1. Residents 3, 5, 9, 22 MDS’s were immediately corrected 1/29/12

2. All residents have the potential to be affected.

3. All MDS Staff were re-inserviced on ensuring accuracy of the MDS.

4. The MDS Coordinator will complete 10 random MDS audits weekly for 1 month, then 10 random MDS audits monthly for 2 months for accuracy. Findings will be reported to the Quality Assurance Committee for review and corrective action measures will be implemented as deemed necessary.
F 278  Continued From page 1
#3, 5, 9, and 22) sampled residents.

The findings included:

1. Medical record review for Resident #3 documented an admission date of 11/19/07 with diagnoses of Hypertension, Congestive Heart Failure, Diabetes Mellitus Type II, Cerebral Vascular Accident, Progressive Dementia, Right Mastectomy 2nd to Cancer, Urinary Tract Infection, Urinary Obstruction, Urinary Retention, Constipation, Psychosis, Glaucoma, Low Iron and Gastroesophageal Reflux Disease. Review of Resident #3's annual MDS dated 9/15/11 documented, "...ROM Limits 1 Impairment on one side... A. Upper extremity (shoulder, elbow, wrist, hand) ... Urinary Continence... 3 Always Incontinent..." Review of the care plan initiated 6/18/09 and updated 12/15/11 documented "...hand contractors..." The care plan initiated 9/22/10 and updated 12/15/11 documented..."Resident has indwelling foley catheter..." The MDS did not reflect that Resident #3 had bilateral impairments and that the resident was continent with the use of a foley catheter.

Observations in Resident #3's room on 1/10/12 at 10:30 AM, Resident #3 had hand splints to left and right hand and a Foley catheter.

2. Medical record review for Resident #5 documented an admission date of 6/15/11 with diagnoses of Congestive Heart Failure, Chronic Kidney Disease, Hypertension, Diabetes and Edema. Review of the MDS dated 12/01/11 documented, "...Section H ...H0100 A. Indwelling catheter..." The MDS was coded incorrectly for the use of a catheter.

Observations in Resident #5's room on 1/9/12 at 9:31 AM, revealed Resident #5 did not have a catheter.

During an interview at the west nurses' station on 1/10/12 at 9:30 AM, Nurse #7 verified that Resident #5 did not have a catheter and has not had a catheter while in the facility.

3. Medical record review for Resident #9 documented an admission date of 10/3/07 and a readmission date of 7/15/11 with diagnoses of Paranoid Schizophrenia, Sacral Decubitus, Hypomagnesemia, Dehydration, Altered Mental Status, Neurogenic Bladder and Hypokalemia. Review of a physician's order dated 1/6/12 documented, "...Foley catheter... neurogenic bladder..." Review of the MDS dated 12/13/11 documented, "...HO100 Appliances... None of the above [Indwelling catheter, External catheter, Ostomy, Intermittent catheterization],..." and H0300 Urinary Continence "...Always incontinent..." the MDS was not coded correctly for the use of a foley catheter.

Observations in Resident #9's room on 1/9/12 at 11:00 AM, 2:30 PM and 4:00 PM, and on 1/10/12 at 7:15 AM and 9:30 AM, revealed Resident #9 with Foley catheter in place.

During an interview in the conference room on 1/11/12 at 10:06 AM, Nurse #10 stated, "...I couldn't find the Foley listed on the MDS. It was my mistake [not coding the foley catheter on the MDS]."

4. Medical record review for Resident #22
F 278  Continued From page 3

documented an admission date of 12/14/11 with diagnoses of Cerebrovascular Accident, Hypertension and Atrial Fibrillation. Review of the "Resident Initial Influenza & [and] Pneumococcal Vaccine Administration Acceptance & Declination" dated 12/14/11 documented that the resident declined both the influenza and the pneumococcal vaccines. Review of the MDS dated 12/20/11 documented, "...Section O Special Treatments, Procedures, and Programs... Influenza Vaccine... If influenza vaccine not received, state reason...5. Not offered... Pneumococcal Vaccine... If Pneumococcal vaccine not received, state reason...3. Not offered..." The MDS did not accurately document the vaccines were offered and declined by the resident.

F 309  483.25 PROVIDE CARE/SERVICES FOR HIGHEST WELL BEING

Each resident must receive and the facility must provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being, in accordance with the comprehensive assessment and plan of care.

This REQUIREMENT is not met as evidenced by:

Based on policy review, medical record review, observation and interview, it was determined the facility failed to follow physician's orders for splints or elevating arms on pillows for 2 of 23 (Residents #3 and 5) sampled residents and failed to document interventions for lack of bowel movements for 1 of 23 (Resident #6) sampled.

F 278  

F 309  1. RI#3 Splints were applied. RI#5 Arms were elevated and RI #6 had results.

2. All residents have the potential to be affected

3. All Restorative staff will be re-inserviced on applying splints. All licensed staff will be re-inserviced on following policy on BM's after 72 hours. All Licensed Staff will be re-inserviced on accuracy, completeness and following of physician orders.

4. The Director of Nursing or Designee will complete 10 random Splint, Physician Orders and Bowel Movement audits weekly for 1 month, then 10 random audits monthly for 2 months for
F 309 Continued From page 4 residents.

The findings included:

1. Medical record review for Resident #3 documented an admission date of 11/19/07 with diagnoses of Hypertension, Congestive Heart Failure, Diabetes Mellitus Type II, Cerebral Vascular Accident, Progressive Dementia, Right Mastectomy 2nd to Cancer, Urinary Retention, Gastroesophageal Reflux Disease and Low Iron. Review of physicians orders dated 1/6/11 documented, "...BILATERAL HAND SPLINTS APPLY 4-[to] 6 DAILY HRS [hours] with PROME [passive range of motion extremity] X [time] 15 MIN [minutes] BELIEVE [before], DURING, AND AFTER SPLINT WEAR..."

Observations in Resident #3's room on 1/9/11 at 9:35 AM, 2:15 PM, and 5:55 PM, revealed Resident #3 was not wearing hand splints as ordered.

During an interview in the conference room on 1/11/12 at 1:00 PM, the Director of Nursing (DON) was asked how often and when splints should be applied. The DON stated, "...everyday or as ordered..."

2. Medical record review for Resident #5 documented an admission date of 6/15/11 with diagnoses of Congestive Heart Failure, Chronic Kidney Disease, Edema, Diabetes and Hypertension. Review of physician's orders dated 1/6/12 documented, "...Elevate both arms on pillows above heart level Dx [diagnosis] edema..."

Observations in Resident #5's room on 1/9/12 at...
F 309 Continued From page 5
9:31 AM, 2:15 PM and 4:30 PM, and on 1/10/12
at 7:25 AM, revealed Resident #5's arms were
not elevated on pillows as ordered.

During an interview at the west nurses' station on
1/10/12 at 9:30 AM, Nurse #7 verified that
Resident #5's arms were supposed to be
elevated above the level of the heart due to
edema.

3. Review of the facility's "BOWEL
ELIMINATION PROTOCOL" policy documented,
"...2. Licensed nurses are alerted via the
"Dashboard"...of residents who have not
eliminated in 72 hours or 9 shifts... 3. The
resident Bowel Regimen will be found on the MD
[medical doctor] orders or as per care plan..."

Medical record review for Resident #6
documented an admission date of 11/21/08 and a
readmission date of 1/24/09 with diagnoses of
Peripheral Vascular Disease, Diabetes Mellitus,
Cerebral Vascular Accident, Hypertension and
Presenile Dementia. Review of the physician's
recertification orders dated 1/6/12 documented,
"...DUCOLAX 5 MG [milligram] TABLET EC
[enteric coated] TWO (2) TABLETS (10 MG) BY
MOUTH ONCE DAILY AS NEEDED..." Review
of the "Elimination Report" from 10/1/11 to 1/9/12
had no bowel movements (BM) documented on
10/11/11, 10/2/11, 10/3/11, 10/4/11, 11/27/11,
11/28/11, 11/29/11, 12/26/11, 12/27/11 and
12/28/11. The facility was unable to provide
documentation that a laxative was given for no
BM in 72 hours as ordered or per policy.

During an interview at the east nurses' station on
1/11/12 at 1:05 PM, Nurse #9 confirmed no
F 309 Continued From page 6
intervention was documented for no BM in 72
hours as per policy.
F 328 483.25(k) TREATMENT/CARE FOR SPECIAL
NEEDS

The facility must ensure that residents receive
proper treatment and care for the following
special services:
- Injections;
- Parenteral and enteral fluids;
- Colostomy, ureterostomy, or ileostomy care;
- Tracheostomy care;
- Tracheal suctioning;
- Respiratory care;
- Foot care; and
- Prostheses.

This REQUIREMENT is not met as evidenced by:
Based on policy review, medical record review,
observation and interview, it was determined the
facility failed to administer oxygen at the
physician’s prescribed rate for 3 of 7 (Residents
#8, 11, and 22) sampled residents receiving
oxygen.

The findings included:
1. Review of the facility’s "OXYGEN THERAPY"
policy documented...RESPONSIBILITY: All
licensed Nursing Personnel... 4. Adjust delivery
rate as ordered...

2. Medical record review for Resident #8
documented an admission date of 11/12/09 and a
readmission date of 8/17/10 with diagnoses of
Alzheimer’s, Urinary Tract Infection, Pneumonia,
F 328  Continued From page 7

Observations in Resident #8's room on 1/9/12 at 10:35 AM, revealed Resident #8 receiving O2 at 1.5 L/BNC.

Observations in Resident #8's room on 1/9/12 at 2:00 PM, revealed Resident #8's O2 cannula was laying on the bedside.

Observations in Resident #8's on 1/9/12 at 6:15 PM and on 1/10/12 at 7:15 AM, 9:30 AM, 11:30 PM, and 2:30 PM, revealed Resident #8 was receiving O2 at 2 L/BNC.

During an interview in Resident #8's room on 1/11/12 at 9:15 AM, Nurse #9 was asked to confirm the O2 setting on Resident #8's O2 concentrator. Nurse #9 stated, "...2 [L/BNC]."

Nurse #9 was asked to confirm the physician's order for Resident #8's O2 rate. Nurse #9 stated, "...4 [L/BNC]."

3. Medical record review for Resident #11 documented an admission date of 10/20/11 with diagnoses of Pulmonary Edema, Congestive Heart Failure, Chronic Obstructive Pulmonary Disease and Cardiomyopathy. Review of a physician's order dated 12/11/11 documented, "...O2 @ 2 L BNC continuous Dx [diagnosis] SOB [shortness of breath]."

Observations in Resident #11's room on 1/9/12 at
ALLENBROOKE NURSING AND REHABILITATION CENTER

### F 332 Continued From page 9

This REQUIREMENT is not met as evidenced by:

Based on medical record review, observation and interview, it was determined the facility failed to ensure the medication error rate was less than five percent (%) when 3 of 10 medication nurses (Nurses #1, 3, and 5) were observed to make medication errors. Three (3) errors were made out of 41 opportunities for error, which resulted in a medication error rate of 7.31%.

The findings included:

Observations in RR #1's room on 1/8/12 at 5:00 PM, Nurse #1 did not administer 300 mg of Ferrous Sulfate to RR #1 as ordered.

During an interview at the west nurses' station on 1/9/12 at 6:27 PM, Nurse #1 was asked if RR #1 received the Ferrous Sulfate as ordered. Nurse #1 stated, "No."

The failure to administer the Ferrous Sulfate as ordered resulted in medication error #1.

3. All licensed staff will be re-inserviced on proper medication administration.

4. Director of Nursing or designee will conduct 5 random Medication Pass Audits weekly for 1 Month then 5 Random Medication Passes Monthly for 2 Months, to ensure compliance. Findings will be reported to the Quality Assurance Committee for review and corrective action measures will be implemented as deemed necessary.
2. Medical record review for RR #6 documented an admission date of 8/5/10 with diagnoses of Diabetes Mellitus Type II, Hypertension, Sinusitis, and Coronary Artery Disease. Review of the physician's order dated 1/6/12 documented, 
....FLONASE 0.05 % NASAL SPRAY TWO (2) SPRAYS IN EACH NOSTRIL DAILY AS NEEDED..."

Observations in RR #6's room on 1/10/12 at 9:50 AM, Nurse #3 administered Fluticasone (Flonase) 50 micrograms 1 spray in each of RR #6's nostrils.

During an interview at the east nurses' station on 1/11/12 at 7:40 AM, Nurse #3 was asked about the administration of the nasal spray to RR #6. Nurse #3 stated, "I did 2 sprays to the left nostril and 1 spray to the right..."

The failure to administer 2 sprays of Flonase Nasal Spray in each of RR #6's nostrils as ordered resulted in medication error #2.

3. Medical record review for RR #5 documented an admission date of 3/24/10 with diagnoses of Conjunctivitis, Coronary Artery Disease, Hypertension, Chronic Kidney Disease, Arthritis, Anemia, and Alzheimer's Disease. Review of a physician's telephone order dated 1/4/12 documented, "Cipro [Ciprofloxacin] eye gttS [drops], 3 gttS left eye TID [three times each day] X [times] 7 days."

Observations in RR #5's room on 1/10/12 at 9:10 AM, Nurse #5 instilled Ciprofloxacin Ophthalmic Solution 0.3% 1 gtt in RR #5's left eye.
During an interview at the west nurses' station on 1/11/12 at 7:30 AM, Nurse #5 was asked about the order for the Cipro eye gts. Nurse #5 stated, "I gave 1 drop in the left eye..."

The failure to administer 3 gts of Ciprofloxacin Ophthalmic solution in RR #5's left eye as ordered resulted in medication error #3.

The facility must:
1. Procure food from sources approved or considered satisfactory by Federal, State or local authorities; and
2. Store, prepare, distribute and serve food under sanitary conditions

This REQUIREMENT is not met as evidenced by:

Based on observation and interview, it was determined the facility failed to ensure food was stored under sanitary conditions as evidenced by expired nutritional supplements in 2 of 2 (East hall and Central hall storage rooms) supplement storage rooms.

The findings included:

1. Observations in the supplement storage room located on the east hall on 1/9/12 at 3:00 PM revealed the following:
   a. 17 cans of Glucerna 1.0 cal with a use by date 1/29/12

F 371 1. All expired formula was immediately discarded 1/29/12
2. All residents receiving enteral nutrition have the potential to be affected
3. All licensed staff and the Central Supply Clerk will be re-instructed on discarding enteral nutrition on or prior to expiration date.
4. Director of Nursing or designee will conduct weekly Enteral Nutrition audits for 1 Month then Monthly for 2 Months, to ensure compliance. Findings will be reported to the Quality Assurance Committee for review and corrective action measures will be implemented as deemed necessary.
F 371 Continued From page 12 of 9/1/11.

b. 12 cans of Jevity 1.2 cal with a use by date of 7/1/11.

c. One 1000 milliliter (ml) bottle of Osmolite 1 cal with a use by date of 8/1/11.

2. Observations in the supplement storage room located on the central hall on 1/9/12 at 3:15 PM revealed the following:

a. 16 cans of Two Cal HN with a use by date of 9/1/11.

b. One 1000 ml bottle of Osmolite 1.2 cal with a use by date of 9/1/11.

3. During an interview on the central hall on 1/9/12 at 3:30 PM, the Director of Nursing was asked about the expired nutritional supplements. The DON confirmed the use by date of the supplements had been exceeded. The DON stated, "...She [central supply clerk] should get those [expired supplement feedings] out of here..."

F 502 483.75(i)(1) ADMINISTRATION

The facility must provide or obtain laboratory services to meet the needs of its residents. The facility is responsible for the quality and timeliness of the services.

This REQUIREMENT is not met as evidenced by:

Based on policy review, medical record review, and interview, it was determined the facility failed to obtain laboratory tests as ordered by the physician for 2 of 26 (Residents #2 and 19) sampled residents.
F 502 corrective action measures will be implemented as deemed necessary.

1. Review of the facility's "LABORATORY TESTS" policy documented, "...Lab tests are completed as ordered by the physician..."

2. Medical record review for Resident #2 documented an admission date of 1/15/11 and a readmission date of 10/21/11 with diagnoses of Alzheimer's Dementia, Parkinson's Disease, Anemia, Hypertension, Gastroesophageal Reflux Disorder, Right Hip Fracture, and Failure to Thrive. Review of a physician's order dated 11/25/11 documented, "...pre-albumin (wt. [weight] loss) 11/28/11..." There was no documentation that the pre-albumin was completed as ordered on 11/28/11.

During an interview in the conference room on 1/11/12 at 10:45 AM, Nurse #11 stated, "...the pre-albumin was not done..."

3. Medical record review for Resident #19 documented an admission date of 11/10/99 with diagnoses Congestive Heart Failure, Diabetes Mellitus II, Urinary Tract Infection, Benign Prostatic Hypertrophy, Scleritis, Anemia and Exposure Keratoconjunctivitis. Review of the physician's orders dated 1/6/12 documented, "...UA [urinalysis] FOR MICROALBUMIN YEARLY (APR) [April]..." Review of the laboratory report dated 4/21/11 documented, "...MICROALBUMIN SPECIMEN QUANTITY NOT SUFFICIENT FOR TEST..." The facility was unable to provide documentation that the urinalysis specimen was recollected.

During an interview in the conference room on...
**F 502 Continued From page 14**

1/11/12 at 1:00 PM, the Director of Nursing (DON) was asked what should be done when a yearly lab is not done due to insufficient amounts. The DON stated, "...do it next lab day..."

**F 514 483.75(1)(1) RECORDS-COMPLETE/ACCURATE/ACCESSIBLE**

The facility must maintain clinical records on each resident in accordance with accepted professional standards and practices that are complete, accurately documented, readily accessible, and systematically organized.

The clinical record must contain sufficient information to identify the resident; a record of the resident's assessments; the plan of care and services provided; the results of any preadmission screening conducted by the State; and progress notes.

This REQUIREMENT is not met as evidenced by:

Based on policy review, medical record review, and interview, it was determined the facility failed to ensure physician's orders were accurate for 2 of 15 (Residents #1 and 12) sampled residents.

The findings included:

1. Review of the facility's "PRINTED PHYSICIAN ORDERS" policy documented, "...1. Each month new Physician's Orders and MARs [medication administration records] / TARs [treatment administration record] will be printed, checked, and corrections made as necessary by licensed nurses prior to the implementation..."
2. Medical record review for Resident #1 documented an admission date of 5/23/02 and a readmission date of 10/20/11 with diagnoses of Cerebral Vascular Accident, Congestive Heart Failure, Diabetes Mellitus, and Hypertension.

Review of the physician's recertification orders dated 11/6/11 documented, "...CBC Q [every] 6 MONTH (OCT) CHEM [chemistry] PROFILE Q 6 MONTH (OCT) THYROID PROFILE Q YEARLY (OCT)..."

Review of the physician's recertification orders dated 1/6/12 documented, "...CBC Q 6 MONTH (May-Nov) CHEM PROFILE Q 6 MONTH (May-Nov) THYROID PROFILE Q YEARLY (Nov) ALBUMIN Q 6 MONTHS (May-Nov)."

During an interview at the central nurses' station on 1/11/12 at 8:55 AM, the Director of Nursing (DON) confirmed the 11/6/11, 12/8/11 and 1/6/12 recertification orders were not accurate for lab orders.
F 514 Continued From page 16

3. Medical record review for Resident #12 documented an admission date of 7/16/11 with diagnoses of Dementia, History of Left Hip Fracture, Diabetes Mellitus and Degenerative Joint Disease. Review of the December 2011 physician’s recertification orders documented that a complete blood count and comprehensive metabolic panel were to be drawn every 6 months. Review of the physician’s recertification orders dated 1/6/12 documented, "...LAB [laboratory] ORDERS..." with no listed labs.

During an interview at the east nurses’ station on 1/11/12 at 2:00 PM, Nurse #9 was asked about the lab orders. Nurse #9 confirmed that the orders were not carried over from the previous month’s recertification orders and stated, "...it was an oversight..."
