Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
K025 Continued From page 1
least a one half hour fire resistance rating in accordance with 8.3. Smoke barriers may terminate at an atrium wall. Windows are protected by fire-rated glazing or by wired glass panels and steel frames. A minimum of two separate compartments are provided on each floor. Dampers are not required in duct penetrations of smoke barriers in fully ducted heating, ventilating, and air conditioning systems. 19.3.7.3, 19.3.7.5, 19.1.6.3, 19.1.6.4

This STANDARD is not met as evidenced by:
Based upon observation and interview, the facility failed to assure building fire barrier construction was maintained.

The Findings include:
Observation and interview with the Maintenance Director, on January 4, 2012 at 11:30 a.m. confirmed the 4-hour wall at station 4 had multiple unsealed penetrations.
Observation and interview with the Maintenance Director, on January 4, 2012 at 11:50 a.m. confirmed the fire wall and fire-rated ceiling by the mechanical room near room 115 was damaged and not sealed with a firestop system.

K029 NFPA 101 LIFE SAFETY CODE STANDARD
One hour fire rated construction (with ¾ hour fire-rated doors) or an approved automatic fire extinguishing system in accordance with 8.4.1 and/or 19.3.5.4 protects hazardous areas. When the approved automatic fire extinguishing system option is used, the areas are separated from

K025 C. What measures will be put in place or what systematic changes will you make to ensure that the alleged deficient practices does not recur:
Re-educate maintenance staff on the importance of ensuring penetrations are filled immediately on 1/4/12 by the nursing home administrator. The penetrations in the 4-hour wall at station 4 were filled on 1/4/12. The penetrations in the firewall and fire rated ceiling by mechanical room near room 115 were filled on 1/4/12.

D. How the corrective action(s) will be monitored to ensure the deficient practice will not recur and what quality assurance program will be put in place:
The Maintenance Director will report the findings of the audit to the performance improvement committee for three months. The performance improvement committee will review the results. If it is deemed necessary by the committee, additional education may be provided, the process evaluated/revised and/or the audits reviewed, for three months or until 100% compliance is achieved.

K029
A. What corrective actions will be taken to correct this alleged deficient practice?
No residents were affected.
B. Identify residents that have the potential to be affected by the alleged deficient practice.
All residents have the potential to be affected.

other spaces by smoke resisting partitions and doors. Doors are self-closing and non-rated or field-applied protective plates that do not exceed 48 inches from the bottom of the door are permitted. 19.3.2.1 |

This STANDARD is not met as evidenced by:
Based on observation and interview, the facility failed to assure rooms larger than 50 square feet, used to store combustible materials, were provided with door closers.
The findings include:
Observation and interview with the Maintenance Director, on January 3 at 10:16 a.m. confirmed the mechanical room by room 111, Medical records storage room doors in Station 2 and 3 were not provided with door closers (NFPA 101, 19.3.2.1 (7)).

| K050 | SS=F
NFPA 101 LIFE SAFETY CODE STANDARD
Fire drills are held at unexpected times under varying conditions, at least quarterly on each shift. The staff is familiar with procedures and is aware that drills are part of established routine. Responsibility for planning and conducting drills is assigned only to competent persons who are qualified to exercise leadership. Where drills are conducted between 9 PM and 6 AM a coded announcement may be used instead of audible alarms. 19.7.1.2 |

This STANDARD is not met as evidenced by:

SUMMARY STATEMENT OF DEFICIENCIES
(EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)

K 050
Continued From page 3
Based on observation and interview, the facility failed to assure staff was familiar with fire drills procedures.
The findings include:
Observation during a fire drill conducted on January 4, 2012 at 10:20 p.m. confirmed the person discovering the fire failed to call out the required code phrase and location.
NFPA 101 LIFE SAFETY CODE STANDARD
Electrical wiring and equipment is in accordance with NFPA 70, National Electrical Code. 9.1.2.

This STANDARD is not met as evidenced by:
Based on observation and interview, the facility failed to assure GFCI outlets were located in all wet areas (NFPA 70, 517-20).
The findings include:
Observation and interview with the Maintenance Director, on January 4, 2012 at 9:00 a.m. confirmed GFCI protection was not provided at the Station 3 medication room that had a refrigerator plugged into a power strip next to a sink.
Based on observation and interview, the facility failed to assure electrical devices were protected from contact.
The findings include:
Observation and interview with the Maintenance Director, on January 4, 2012 at 2:15 p.m. confirmed a 120 volt thermostat in the attic above the access by room 117 was not provided with a cover.

K 050
The Maintenance Director will report the findings of the audit to the performance improvement committee for three months.
The performance improvement committee will review the results. If it is deemed necessary by the committee, additional education may be provided; the process evaluated/revised and/or the audits reviewed, for three months or until 100% compliance is achieved.

K 147

SS=D

A. What corrective actions will be taken to correct this alleged deficient practice?
No residents were affected.

B. Identify residents that have the potential to be affected by the alleged deficient practice.
All residents have the potential to be affected.

C. What measures will be put into place or what systematic changes will you make to ensure that the alleged deficient practices does not recur:
Re-education with maintenance staff on assuring GFCI outlets are located in all wet areas and 120 volt thermostats should have a cover on 1/4/12 by Nursing Home Administrator. GFCI outlet installed at Station 3 medication room and cover put on thermostat in attic by room 117 on 1/4/12.
Will do audit of GFCI outlets once a week for three months. Will also audit covers on thermostat once a week for three months.
Maintenance director or ED to monitor.

D. How the corrective action(s) will be monitored to ensure the deficient practice will not recur and what quality assurance program will be put in place.
The Maintenance Director will report the findings of the audit to the performance improvement committee for three months.
The performance improvement committee will review the results. If it is deemed necessary by the committee, additional education may be provided; the process evaluated/revised and/or the audits reviewed, for three months or until 100% compliance is achieved.
